-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3652

1. Applicant's election of Group III, claims 23-32, in the reply filed on 10/26/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2. The information disclosure statement filed 10/6/03 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Note that the one page summaries of each reference from the "www.delphion.com" website do not satisfy the requirement because they are not the complete or actual references as listed on the IDS.

3. The disclosure is objected to because of the following informalities: on page 7, lines 1 and 3, reference numeral "528" is used to denote both "pinholes" and "bar limiter"; also, on page 7, lines 9 and 11, and page 8, line 2, "heads 202" are referenced but they are labeled as "302" in figure 6.

Appropriate correction is required.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3652

5. Claims 27 and 32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The reference to "the exchange base" lacks antecedent basis.

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 23-31 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hollowell (US 6,071,056).

Re claims 28-31, the head gimbal assemblies comprise read/write heads, sliders (micro-actuators) and suspensions, as disclosed in column 1, lines 10-32.

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claim 32 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hollowell in view of Wanesky (US 3,263,841).

Art Unit: 3652

Hollowell does not show securing pin holes in the exchange tray to corresponding pin holes in the packing tray.

Wanesky shows a system of transferring electronic parts from one tray to another, comprising alignment pins 43 for securing corresponding pin holes 28 and 32 in the trays.

It would have been obvious for one of ordinary skill in the art at the time of the invention to have modified the process of Hollowell by utilizing corresponding pin holes in the exchange and packing trays, as suggested by Wanesky, to further align and secure the trays during rotation thereof to ensure that the parts are properly transferred between trays.

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Keenan whose telephone number is 571-272-6925. The examiner can normally be reached on (schedule varies).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eillen Lillis can be reached on 571-272-6928. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
